

## DIGITAL RADIOGRAPHS / X-RAYS

### Sydney Orthodontists – Dr. James Choi

#### Digital X-ray System

Dr. James Choi is committed to providing you with the best orthodontic care possible. As part of this commitment, we have recently added the Kodak Digital X-ray system to our practice and want to tell you more about what you can expect during future visits.

#### Detailed Images for Improved Treatment

The Kodak Digital X-ray system is an imaging system that revolutionizes our patient treatment. It helps us to diagnose more accurately and provide treatment with unprecedented confidence. With precise, crystal-clear digital images, this innovative new system offers our team powerful insights into your orthodontic regions of interest. This capability is essential for a wide range of diagnostics that, in turn, help us devise more accurate treatment plans and answer any questions you have about your orthodontic care and treatment options.

#### Reduced Exposure to Radiation

Because our new Kodak Digital X-ray system allows us to target a precise area for exposure, you will be exposed to significantly less radiation other dental traditional X-ray units that lack this digital capability. The system combines speed, image quality and precision placement to dramatically reduce the occasional need for retakes. By using less radiation dose than conventional X-ray systems, it better helps us adhere to the ALARA Principle – or, “As Low As Reasonably Achievable” – which we follow to ensure we take every precaution to minimize your exposure to radiation when obtaining the necessary diagnostic images needed for your orthodontic treatment planning.

#### Trusted Technology

The Kodak Digital X-ray system was designed by Carestream Health. For more than 100 years, Carestream Health (formerly Kodak’s Health Group) has provided state-of-the-art diagnostic imaging products and support to dentists and other oral health practitioners worldwide. Our Kodak Digital X-ray system utilizes latest technology to delivery superb image quality for fast and accurate orthodontic diagnosis and treatment.

#### Benefits

- High resolution images: Dr. James Choi can see your teeth and jaws with unprecedented detail
- Less radiation: your and your Child’s health and safety is Dr. James Choi’s greatest concern
- Comfortable positioning: the system’s open design makes exams more comfortable, with both seated and standing options to accommodate patients of all sizes
- Improved care: Dr. James Choi can perform a wider range of diagnoses with even greater accuracy, reducing multiple visits to save you time and money

We are here to provide you with remarkable orthodontic care, every time. If you have any questions regarding technologies employed by our practice, please feel free to contact us. We’re eager to help you with all your oral health needs.
